

Remote Power IP Switch - Firmware Release Notes

Compatible Models	UIS-522*, UIS-523*, UIS-622B
Release Date	February 8, 2023
Firmware Version	MNT.3207

NEW

[New #0179]: In GUI > Configuration > Network > Cloud > Cloud Services. A new [Link to Cloud4UIS] added. Follow link to Add the device to Cloud4UIS account.

[New #0706]: Support 'Add by S/N v2.0'.

[New #0747]: Option to enter user's HTTPS Certificate / Key. Configuration > System > HTTPS Certification. Device will reboot, power output not affected. Certificate will be removed if device is Reset to Factory Default. [mtusdw.220518]

[New #1143]: New option for recurring schedule as: Repeat every XX day(s) from [yyyy/mm/dd] [mtusso.2923]

[New #1276]: New GUI > Configuration > System > API > IP Whitelisting.

MODIFIED

[Modified #0645]: Default [Number of Resets] changed from 1x to 3x. [etuspc220408]

[Modified #0745]: HTTP TCP detection to include 'Host'. [mtus3g.220428]

[Modified #0800]: [Cloud Server] > [Enabled] by default.

[Modified #0801]: Removed function of "long press UIS button" will auto assign a fixed LAN IP to device.

[Modified #1093]: During an 'Outlet Reset', the 'UIS Reset' function will be temporarily disabled and 'Ping Delay After UIS Reset' applied upon 'Outlet On'. 'UIS Reset' is re-enabled thereafter. Avoid triggering false-positive 'Auto Reset'.

[Modified #1167]: The Event Log default displayed [Type] changed from [Status] to [All].

[Modified #1217]: Google Hangouts removed. Switching to new Google Chat in upcoming firmware.

[Modified #1234]: Description updated to better match function;

"Ping Delay After UIS Reset" modified to "Ping Delay After Outlet Reset"

"Force UIS Reset after initial power-on" modified to "Force UIS Reset after device power-on"

[Modified #1262]: Cloud Connection Status description updated to;
Enabled (Online) => Cloud Enabled (Device linked to a Cloud account).

Enabled (Offline) => Cloud Enabled (Device unable to reach server). Check local network.

Enabled (-) => Cloud Enabled (Device not linked to a Cloud account).

Disabled (-) => Cloud Disabled.

[Modified #1396]: GUI > Configuration > System Time > Time Server [Edit]. Default to list 15 time servers. User can add 5 more. Limit: 20. [mtusdh.2c07]

[Modified #1553]: Modified device DST-server communications.

FIXED

[Fixed #0770]: Fixed security vulnerability (Eli Fulkerson, [mtusef.2603]).

[Fixed #0771]: Command execution (Eli Fulkerson, [mtusef.2603]).

[Fixed #0829]: [Email Notification] > [Event] [Apply] not shown to retain selection
[mtusrs.220719] [mtuspc.220720]

[Fixed #0900]: Cloud connection needed to be manually restarted, if Skype Bot was initiated first. [mtus3g.220728]

[Fixed #0986]: UIS Reset different if unplug LAN vs unplug WAN. Due to removal of 'Timeout' calculation. Edited to synchronize. [mtustg.2816]

[Fixed #1152]: /goform/login outlet_status.xml does not need csrftoken.[mtusle.220125]

[Fixed #1160]: 'manual time' failed to apply after system restarted. [mtusrk.2a04]

[Fixed #1358]: Resolved GoAhead vulnerability. [mtusjs.2b16]

[Fixed #1358]: Resolved GoAhead vulnerability. [mtusjs.2b16]

[Fixed #1373]: Duplicate Gmail causes "Delivery Status Notification (Failure)" message.
[mtusjs.2b11]

[Fixed #1521]: Fixed Yahoo Mail when used with APP Password issue. [mtus3g.3201] Other minor tweaks & corrections.
