

# Data Sheet

# E3000 Series

The Cradlepoint NetCloud Enterprise Branch Service with E3000 Series Router is suited for fixed branch, healthcare, financial services and retail locations, ideally when combined with need for security services at scale with performance. The all-in-one form factor includes full-featured routing, security, switching with PoE ports and Wi-Fi, making it easy to connect branches to the Internet and critical applications without the need for extra hardware or complicated configurations. And the embedded LTE modem means that connectivity is always available from day 1 without waiting for a wired connection.

## Notable Features

- Take advantage of embedded Cat 18 LTE modem for fast day-1 or primary connectivity.
- Terminate a primary wired broadband link with LTE as failover for highly resilient hybrid connectivity.
- Enable larger branch locations especially when combined with comprehensive security and application analytic ability.
- Integrate into your existing network with standards-based dynamic routing and VPN tunnel support.
- Define policies through centralized, cloud-based management for easy deployment at scale.
- Add a second cellular modem for dual LTE connectivity.
- Add 5G with modular modem capability.

## Ideal for Wireless WAN

For an all wireless WAN, the E3000 offers Gigabit-class LTE performance, which can support the throughput and service needs of an enterprise branch with the ability to add a second LTE connection for increased available bandwidth and reliability. For organizations moving to a Wireless WAN, the E3000 offers the ability to pair LTE with a wired link and use LTE as a failover connection or a primary connection.

## 5G Optimized for Upward Compatibility

The E3000 Enterprise Branch Router is 5G-optimized with the ability to act as a controller for a Cradlepoint 5G Wideband Adapter. The unique capability of Cradlepoint to operate the adapter in captive mode means that the two separate, Ethernet-connected appliances can be managed as a single entity. In addition, the E3000 is designed to embed a future generation modular 5G modem. These two capabilities ensure not only upward compatibility for 5G, but the best investment protection available.

## Performance

Stateful Firewall Throughput:	IPS Throughput:	Application Aware Services & Analytics:	IPSec VPN Throughput:	Concurrent VPN Tunnels:	Concurrent Sessions (TCP):	Typical Client Count:
<b>2 Gbps</b>	<b>1.5 Gbps</b>	<b>1.5 Gbps</b>	<b>400 Mbps</b>	<b>20</b>	<b>130,000</b>	<b>100</b>

Performance testing was conducted based on requirements as defined in RFC2544 using fixed-frame 1518 byte packets. Throughput results reflect uni-directional UDP traffic with less than 1% packet loss as tested with wired connections.

Results do not reflect performance of the cellular wireless operator networks.

<b>Public Safety Network Certifications:</b>	FirstNet Ready™ (including Band 14)
<b>Private Cellular Network:</b>	Yes, includes FCC Part 96 (CBRS Band 48)

<sup>†</sup>Cellular carriers and operators throughout the world may only require telecom industry certifications, like PTCRB or GCF, to operate on their network. Some carriers require additional testing and approval, beyond telecom certifications, to operate on their network. A carrier listed in the approvals section means Cradlepoint completed additional testing and acquired technical approval for that given carrier. Any carrier not listed may not require additional testing or approval beyond telecom industry certifications to operate on their network.

## Ordering Guide

**NetCloud Enterprise Branch Essentials** packages and plans contain all the features and capabilities required for small to mid-sized branch applications. Essentials Packages include 24x7 support (phone support: 24 hour weekdays with emergency response on weekends, web: 24x7, chat: 24x5) and a limited lifetime warranty.

For additional capabilities, a **NetCloud Enterprise Branch Advanced Plan** can be added to the NetCloud Enterprise Branch Essentials Package at any time.

See additional details of what is included in the Essential and Advanced NetCloud software: [cradlepoint.com/netcloud-services](https://cradlepoint.com/netcloud-services)
