Datasheet

Apex IV

Part No:
TG.46.8113

Description:

Apex IV Wideband 5G/4G Dipole Terminal Antenna
400MHz – 6000MHz with 90° Hinged SMA(M) Connector

Features:

- Highest efficiency for 400-6000MHz wideband applications
- Worldwide 5G/4G Coverage
- Dipole Antenna Design – No Ground Plane Required
- Hinged 90° Termination with SMA(M) Connector
- Robust Metal Hinge Design for Improved Connection Reliability.
- Dimensions: 218 * 58mm
- RoHS & Reach Compliant

1. Introduction

The Taoglas Apex IV TG.46.8113 is a wideband 5G/4G dipole antenna that has been designed to cover all sub 6GHz 5G/4G Cellular, ISM and Wi-Fi bands with frequencies in the 400 to 6000MHz spectrum. Evolved from the highly successful Apex range of products, the TG.46 has the highest wideband efficiency of any terminal antenna on the market today. Designed specifically for optimum performance on 5G NR bands between 3.3-4.2GHz, the TG.46 exhibits a uniform omnidirectional radiation pattern that allows for truly uninterrupted 360° 5G connection reliability. Additionally, the extended lower frequency coverage at 410Mhz (Band 87) and 450Mhz (Band 31), makes the TG.46 ideal for a range of IoT applications, such as remote monitoring of smart utilities.

This attractive slim-line antenna is ground plane independent, meaning it does not need to be connected to the ground-plane of a device to radiate efficiently and neither is it in any way detuned by connecting to a ground-plane, thus avoiding a problem that is synonymous with smaller terminal mount antennas. The TG.46 includes an SMA(M) connector as standard, and the swivel mechanism that allows the antenna to be rotated to fit in tight environments and positioned for optimum performance. The 90° metal hinge structure has been designed so that when the antenna is mounted in a 90° position, it retains its position if used in environments prone to vibration.

The Apex IV has been primarily designed for use with wideband 5G/4G modules and devices that require the highest possible efficiency and peak gain to deliver best in class throughput on all major worldwide cellular bands for access points, terminals and routers. High efficiency is vital for applications such as high-speed video and real-time streaming or high capacity MIMO networks on public transportation. The Apex IV is backward compatible with 3G and 2G cellular applications such as HSPA, GSM, GPRS, UMTS, Wi-Fi and even has GPS included for Assisted GPS and/or E911 applications.

In summary, the Apex IV is the ideal solution for any device requiring high, reliable performance. It will meet most types of approval or carrier certification requirements from an efficiency standpoint. The antenna also makes an excellent reference antenna for test purposes. It has been designed as an omnidirectional antenna and the radiation patterns prove this, being stable across all bands. The connector type is customizable and the housing is also available in white. Contact your regional Taoglas customer support team for more information.

2. Specifications

Electrical									
Band	Frequency (MHz)		Efficiency (%)	Average Gain (dB)	Peak Gain (dBi)	Impedance	Max Input Power	Polarization	Radiation Pattern

6. TG.46 Installation Instructions

The TG.46 antenna has an independent rotating SMA connector which enables the user to install the antenna in their preferred orientation. Once tightened, the SMA connector will hold the antenna in place. The following illustrations show the TG.46 used on a wall mounted device as an example.

Step 1:

Adjust the antenna to the preferred orientation having placed it on the SMA(F) connector of the device.

Step 2:

While holding the antenna with one hand, rotate the SMA(M) connector with the other until it is fully tightened. When tightened with the required force, the antenna will hold its position without shifting, even when exposed to high vibration environments.

Note:

If using a torque wrench, the recommended force for mounting the antenna is 0.9Nm, maximum torque to prevent damage to the antenna is 1.17Nm.

7. Packaging

1pc TG.46.8113 per Small PE Bag with Video Link label

Dimensions: 100*280mm

Weight: 73.5g

25pcs per Large PE Bag

Dimensions: 280*430mm

Weight: 1.85Kg

75pcs TG.46.8113 per Carton

Carton Dimensions: 320*250*290mm

Weight: 6.1Kg

Changelog for the datasheet
